SUMMARY

Front-End & AI Application Engineer with 5+ years of experience building scalable React-based web applications and AI-powered workflows. Skilled in React, Python, Next.js, Node.js, accessibility standards, and LLM integrations using LangChain and RAG architectures. Delivered measurable impact through performance optimization, workflow automation, and modern enterprise UI development.

WORK EXPERIENCE

Costrategix

Software Engineer

Jan 2026 - Present
Bengaluru, Karnataka

- Led development of AI-powered healthcare web applications using React 18 micro-frontends, improving HR and medical staff workflows by 35–70% through RAG-based search, real-time chat, and HIPAA-compliant access controls; supported 120+ daily employee interactions.
- Developed a custom VS Code extension with React Webviews and Groq-powered real-time code analysis, reducing production-blocking logic errors by 30%.
- Automated operational workflows using LangGraph-based agents with SLA monitoring and intelligent state transitions, eliminating 20+ hours of weekly manual ticket processing.

Infosys

Senior Front-End Developer (Client: Apple – WeChat Ecosystem)

Jan 2024- Dec 2025
Mangalore, Karnataka

- Architected a React 18/Redux application serving 10,000+ daily users at 99.9% uptime, reducing JavaScript bundle size by 30% through route-based code splitting and custom utility refactoring.
- Engineered cross-platform Mini Program features using TypeScript, WXML, and WXSS; modernized the Node.js/npm dependency stack, boosting runtime stability and performance by 15%.
- Led frontend code reviews and mentored 2 junior engineers on React/TypeScript patterns, establishing shared component standards that streamlined Agile workflows and achieved 95% on-time feature delivery.

Front-End Developer (Client: Macy's – CMS + Shopping Site)

Jan 2022 - Dec 2023
Mangalore, Karnataka

- Engineered Vue.js premier/loyalty landing pages with Foundation.css and vee-validate, cutting form submission errors by 40% and lifting user engagement by 15%.
- Built scalable OMS/CMS interfaces using Ant Design and reusable ES6/JSON table components, slashing development time by 20%; optimized Axios patterns to reduce client-server payload by 25%.
- Drove Agile sprint execution through backlog grooming and continuous feedback loops; partnered with QA and product to cut rework 20% and accelerate feature delivery 15%.

Production Support Software Engineer (Client: Nike – Commerce Production Support)

May 2021 - Dec 2021
Mangalore, Karnataka

- Managed IBM Sterling OMS distributed commerce operations for Nike, monitoring cross-channel order flows and warehouse management system synchronization to maintain fulfillment accuracy.
- Automated SAP/SQL reconciliation reporting and led Agile RCA post-mortems, cutting manual report generation time by 30% and reducing MTTR by 25% through systematic root-cause remediation.
- Conducted ADA/WCAG 2.1 AA audits on Nike's commerce platform; remediated violations via semantic HTML, ARIA labels, keyboard navigation patterns, and color contrast enhancements to achieve full compliance

PROJECTS

Next.js RAG Portfolio (Next.js, React, Groq LLM, Hugging Face, Upstash)

Architected an end-to-end RAG application in Next.js 15 featuring PDF text extraction, sliding-window chunking, Hugging Face sentence embeddings, cosine-similarity vector retrieval, and Groq LLM completions. Added intent detection, off-topic guardrails, three selectable personas, and terminal-style slash commands (/clear, /history, /download).

Next.js RAG Portfolio (Python, Groq LLM, Pydantic ai, streamlit)

Built Content Crew Studio, a Streamlit app that automates content creation using a multi-agent CrewAI workflow. Users input a topic, audience, style, and length; three LLM agents (Researcher, Writer, Editor) powered by Groq collaborate to produce polished, downloadable content.

WCAG Form Builder (React js, Typescript, react hook form, zod)

Accessible drag-and-drop form builder — visually design forms, validate submissions, and export JSON schemas using React 19, TypeScript, and @dnd-kit.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SASS, WXML, WXSS

Frameworks: React 18, Redux Toolkit, Next.js, Vue.js, React Native, Node.js, Ant Design, Bootstrap

AI/LLM Stack: LangChain, LangGraph, CrewAI, Groq, Gemini, ChromaDB, Hugging Face Embeddings, RAG Patterns

Performance: Lazy Loading, Code-Splitting, Lighthouse Audits, Bundle Optimization (Webpack, Vite)

API & Backend: RESTful APIs, JWT/OAuth, Axios

Testing: Jest, Mocha, React Testing Library, Unit & Integration Testing

Tools: Git/GitHub, npm, CI/CD Pipelines, Jira, Confluence, Storybook

Databases: MongoDB, ChromaDB

Compliance: WCAG 2.1, ADA, HIPAA

Soft Skills: Technical Leadership, Agile Collaboration, Mentorship, Production Debugging

EDUCATION

Bachelor of Science in Computer Science

Jul 2017 - Jan 2021

Government First Grade College, Harihara, Karnataka

CERTIFICATIONS

- Infosys Global Agile Developer Certification
- Infosys Certified Front End Web Developer
- Infosys Certified Javascript Programmer
- Infosys Certified React Professional
- MongoDB SI Associate Certification
- Infosys Certified L1 Junior Web Programmer
